Present

F-500 “Encapsulator Technology” Fire Suppression Agent

F-500 Engineered Advantages

- F-500 is a UL Listed Class A and Class B Fire Suppression Agent.
- See how “Encapsulator Technology” differs from both Wetting Agents and Foam.
- See how the Engineered Advantage of F-500 provides Life Safety benefits to your department and community with its rapid heat reduction.
- F-500 is environmentally safe; 100% biodegradable, non-hazardous, noncorrosive, and non-toxic.
- F-500 requires no special equipment, thus making it the clear economic choice.
- F-500 has been tested and proven effective on Class D combustible metals including Lithium Ion Batteries used in Electric Cars and Hybrids
